FOR IMMEDIATE RELEASE

### **EmLogis executes the release of GENERATOR™ 4.1.2**

HOUSTON , Texas , May 15, 2006 - Emlogis, Inc. announced today the release of their GENERATOR™ product version 4.1.2. GENERATOR™, the cutting edge workforce modeling and scheduling solution, helps companies solve their labor needs for the healthcare, retail and service sectors. New features include the ability to select the exact set of shifts for easier scheduling of employees and a redesigned interface that makes it easier for employees to enter the time and days they wish to work. These features use a convenient and intuitive user interface that delivers fast and easy access for employees' scheduling needs.

According to Mark Kirkland, Vice President of Operations for Emlogis, "This is a way for employees to have a voice in the scheduling process," said Kirkland, "Employees want to be able to specify the shifts and days they would like to work and allowing them to input these preferences into the system results in increased employee morale. Initial client response has been very positive."

Dr. Robert Bernard, MD, Chief Software Architect for EmLogis and creator of GENERATOR™ noted "The goal all along was to provide a preference based solution that handled all the complexity of a real-world work environment for any size company. I am very pleased and excited about our new platform."

#### **About EmLogis**

EmLogis delivers the first Employee Logistics solution for healthcare and other service industries. Based on a proprietary mathematical engine, the company delivers the only solution that proactively balances labor requirements, cost, overtime, and employee preference in a staffing model to deliver superior labor deployment. Results from this breakthrough system include reduced costs, reduced turnover, increased employee satisfaction, increased business effectiveness and improved customer service.

#### **About EmLogis GENERATOR™**

The EmLogis GENERATOR™ software is the only workforce modeling/scheduling solution utilizing the proprietary Adaptive Programming technology, has proven to deliver significant efficiency gains by capturing real-world complexity and scaling to model any size labor team for companies in healthcare, retail and service sectors.

Utilizing industry standard technology, GENERATOR™ was designed to operate on a wide variety of platforms and utilize a web services XML to interface to most applications. With the new delivery EmLogis is able to fulfill the strong demand for proactive self-scheduling with healthcare professionals and distribute secure access for all employees from their home or office.
